! Watchdog: This module can be used on all base addresses; there is no interaction with the watchdog on the CPUs. For details, please refer to the "Watchdog" section of the manual 26-856_ENG, which describes the correct use of the watchdog in conjunction with PCD2 components.
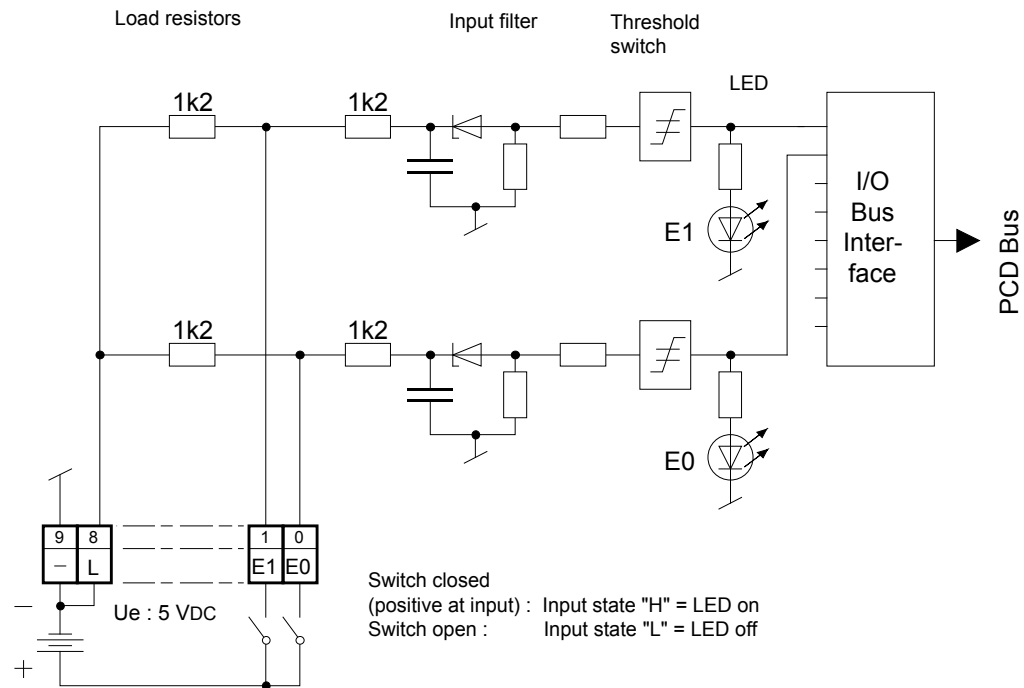

! I/O modules and I/O terminal blocks may only be plugged in and removed when the Saia PCD® and the external +5 V are disconnected from the power supply.
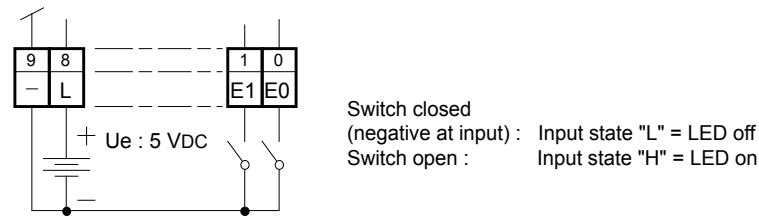

i Information to connection cables can be found in the Manual on "System cables and connection system" 26-792_ENG.

Source operation (positive logic):

Switch closed
(positive at input) : Input state "H" = LED on
Switch open :   Input state "L" = LED off

Sink operation (negative logic):

Switch closed
(negative at input) : Input state "L" = LED off
Switch open :   Input state "H" = LED on
